Welcome!

January 1, 2012

Welcome to the new Comfort Products, Inc. Catalog! This is the first truly comprehensive catalog that has been offered by Comfort Products. It was designed to offer quick and easy access to information on the items manufactured and distributed by our company.

Comfort Products has been serving our customers for over 100 years. Throughout the years, we have become the Innovation Leader in Knitted Orthotic and Prosthetic Products.

Our innovations include:

- First to incorporate X-Static® silver yarn into products for Orthotics and Prosthetics
- First to offer a Seamless Diabetic Sock
- First to marry X-Static® silver yarn with CoolMax® fabric
- Developed and introduced SpectraCarb™, a unique lamination stockinette that combines Spectra fibers and Carbon, offered exclusively by Comfort Products, Inc.

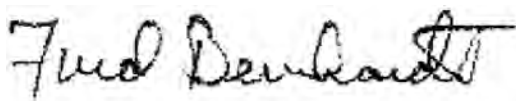

For the first time, the Comfort catalog includes part numbers for all items. An easy to use index and comprehensive price list are also included. Please take some time to review the catalog, as many of our items are truly innovative. Some newer items are also included.

Comfort Products is a family owned company and we pride ourselves in giving personal attention to your needs. The Bernhardt family has owned and operated Comfort Products for over 30 years. This catalog represents another first for the company, as three generations of Bernhardts were involved in its development.

We are committed to offering the highest quality knitted products for Orthotics and Prosthetics at reasonable prices. We have also committed ourselves to offering the finest personal service available. Give us a call today. Your call will be answered by a real person, committed to making your experience with Comfort Products a pleasant one.

At Comfort Products, we live up to our name every day!

Sincerely,

Fred Bernhardt
Vice President

Sales and Shipping Information

Minimum Order and Handling Charges

Comfort Products has no minimum order requirements and no handling charges!

Shipments

All U.S. shipments are F.O.B. Croydon, Pennsylvania, USA. Shipments are sent freight prepaid with actual shipping costs added to the customer invoice.

Prices, Payments, and Past Due Accounts

Prices are subject to change without notice. Prices charged are the prices that are in effect at the time of the shipment. All invoices are NET 30 days and are payable in U.S. Dollars. Past due accounts will incur interest charges at the rate of 1½% per month (18% per year) on all past due balances.

Conditions of Acceptance

All orders are accepted on the basis of the prices that are prevailing at the time of the shipment, unless otherwise agreed to in writing by an officer of Comfort Products, Inc. This Sales and Shipping Information Sheet includes all of our terms and obligations upon acceptance of any order. This is true regardless of any other terms, stipulations, etc. that may be included in any request for quotation submitted to Comfort Products, Inc., or that may appear in any order form submitted at any time by the buyer. All orders are subject to acceptance by Comfort Products, Inc.

Shortages and Damage

All shipments are carefully counted and inspected at the time of packing each shipment. Immediately upon receipt, merchandise should be counted and inspected for any damage or discrepancies. Any damage that may have occurred in transit is the responsibility of the carrier and claims for damage must be made by the buyer directly with the carrier. Notice of any other claims must be made to Comfort Products, Inc. within ten days of the invoice date.

Returns

Standard Items must be returned within 45 days of the invoice date. No returns shall be accepted after 45 days. Custom, Special, and Non-Standard items which are usually made-to-order may not be returned. A Return Authorization must be obtained from Comfort Products, Inc. prior to returning any merchandise. When requesting a return authorization please furnish; (1.) Invoice number, (2.) Specific item being returned, (3.) Quantity involved, (4.) Reason for return. The Return Authorization Number must be prominently displayed on the outside of the return package. Packages returned without a return authorization will not be accepted. Credit for authorized returns will be issued for the invoice price, less freight charges and a 20% Restocking Fee.

Warranties

Comfort Products, Inc. makes no warranty, either expressed or implied, that any items purchased are suitable for any particular purpose that may be required by the buyer. Under no circumstances does Comfort Products accept responsibility for consequential damage resulting from incorrect or imperfect merchandise. Any liability is limited to invoice price or replacement, at our option.

Comfort RegalTM Acrylic Stretch Prosthetic Sock

The Comfort RegalTM Acrylic Stretch Prosthetic Sock continues to be one of the most popular choices for prosthetic socks among amputees. The tradition lives on with Comfort's combination of the latest advancements in fiber technology with the finest knitting equipment available. The unique blend of Acrylic and Lycra provides a degree of stretch and conformance to the residual limb that is not possible with other fiber combinations. With all of these advantages the Comfort Regal sock is truly in a league of its own!

Features of the Comfort RegalTM Acrylic Stretch Prosthetic Sock include:

- Wicks moisture away from skin, keeping the wearer dry and comfortable
- Fleeced interior is extremely soft and luxurious
- Rounded toe design prevents common distal bunching
- Easy care with the ability to machine wash and dry
- Great stretch fits most amputees with fewer sizes than other socks
- Approximately 60% of amputees can be fit with just two sizes!
- Available in 2, 3, 5, 6 and 7 ply, with a wide range of sizes
- Also available with a 3S hole, either knitted or vulcanized

Take the Comfort Challenge and compare the soft and luxurious feel of the Comfort Regal sock to any other stretch sock on the market. We believe that you will agree with us that the Comfort Regal is the softest and best feeling prosthetic stretch sock available!

Feature-Rich Socks

CoolMax® and X-Static® Silver Prosthetic Stretch Sock

"The sock with the silver lining"

***Need a sock that is soft, keeps the wearer dry, eliminates odors,
helps prevent dermatitis and rashes, and is affordable?***

The Comfort AG™ Prosthetic Stretch Sock is like no other prosthetic sock available on the market! The AG is made using **CoolMAX** fabric plaited with **Xstatic** silver. The **CoolMAX** wicks moisture away from the body to help keep the wearer dry and comfortable. Silver **Xstatic** is a natural anti-microbial, eliminating odor causing bacteria and fungi. Having silver directly against the skin allows the wearer to receive maximum anti-microbial protection.

Features of the Comfort Ag Sock include:

- Wicks moisture away from skin, keeping the wearer dry and comfortable
- Fleeced interior is extremely soft and comfortable
- Natural anti-microbial protection, eliminating odor causing bacteria
- Helps prevent dermatitis and rashes
- Great stretch, fits most amputees with fewer sizes than other socks
- Approximately 60% of amputees can be fit with just two sizes!
- Keeps wearer cooler in summer and warmer in winter
- Available in 2, 3, 5, 6 and 7 ply with a wide range of sizes
- Also available with a 3S hole, either knitted or vulcanized
- Same sizes and pricing as the extremely popular Comfort Regal sock!

Try the hi-tech Comfort Ag Prosthetic Sock for yourself. We have not found a prosthetic sock on the market that feels this good, or that has this many great features and benefits. However, we invite you to be the judge. We believe the choice will become quite clear – The Comfort Ag. When you only want the very best.

At Comfort Products, we live up to our name every day!

SoftWick™

CoolMax® Stretch Prosthetic

HALF SOCK™

The ideal solution for managing distal volume changes with a liner!

Why pay for a whole sock when all you need is a Half Sock?

If you have ever received that call late on a Saturday night, you will never forget it. You cut off an old sock and put a hole in the distal end so that you could fill in some volume distally on your patient's liner. Then the sock unraveled late on a Saturday night and your patient could not get out of their prosthesis, so they called you. Sound familiar?

The SoftWick Prosthetic Half Sock from Comfort Products is the solution to this problem with managing distal volume. The distal hole is knit right into the sock to ensure a proper fit, without unraveling, every time. The CoolMax® and Lycra construction stretches to accommodate a multitude of shapes. Four sizes ensures a proper fit for almost any application. The color band knit into each sock allows easy size identification.

SoftWick™ Half Sock™					
Sizes and Part Numbers					
Size	Band Color	Length	Top Width	Toe Width	Part Number
1	Black	3"	3"	2 1/2"	SW21
2	Gray	3"	3 1/2"	3"	SW22
3	Royal Blue	6"	4"	2 3/4"	SW23
4	Turquoise	6"	5 1/2"	3 1/2"	SW24

Also available by Special Order without a hole!

PLY-TWOTM SUPER SOFT Prosthetic Sock

Amazing Stretch in Both Length and Width

The Sock of Choice for New Geriatric Amputees and a Great Post-Op Sock!

The Comfort Ply-TwoTM Super Soft Prosthetic Sock is the softest sock available on the market today. The amazing stretch allows more amputees to be fit with fewer sizes.

The Comfort Ply-TwoTM is a feature rich sock with reinforcements for durability, double fleecing for comfort, and acrylic fibers for wicking moisture away from the skin.

Features of the Ply-Two Super Soft Prosthetic Sock include:

- Amazing stretch allows more amputees to be fit with fewer sizes
- 2 ply Acrylic and Lycra construction
- Wicks moisture away from the skin, keeping the wearer dry and comfortable
- Nylon reinforced toe for longer wear life
- Rounded toe eliminates common distal end pocket
- Non-allergenic for sensitive skin
- Flat seamed interlocking top stitch for added durability
- Machine washable

"The Softest Prosthetic Sock on the Planet"

BIO-WICK™

One Ply Sock

A CoolMax® and Cotton Seamless Prosthetic Sock that wicks moisture and has anti-microbial protection!

The Bio-Wick Single Ply Prosthetic Sock is a unique one ply equivalent thickness seamless sock. The CoolMax® interior wicks moisture away from the skin keeping the wearer dry and comfortable. Moisture is transported to the Cotton outer layer of the sock where it can transfer the moisture to the air or to another sock. The Bio-Wick sock provides great comfort thanks to the exceptional stretch that allows conformity to virtually any shape. The non-run construction allows the sock to be cut to length without unravelling.

Features of the Bio-Wick Sock include:

- Microsafe Anti-Microbial provides continuous protection against odor causing bacteria
- CoolMax® fibers wick moisture away from the skin, keeping the wearer dry and comfortable
- Completely seamless design reduces risk of irritation
- Exceptional stretch conforms to virtually any shape
- Non-run construction allows for cutting to length without unravelling
- Can be used effectively for AK, BK, Symes and upper extremity applications
- Machine washable
- Available with a vulcanized 3S hole

Bio-Wick Sizes and Part Numbers

Add "3" to the end of any Bio-Wick part number for a vulcanized 3S hole

Ultra-Fit Filler Sock™

The Stretchable Sock That Fits Like a Glove!

The Comfort Ultra-Fit Filler Sock has amazing stretch that allows it to conform to irregular shapes with ease. Our special knitting allows the standard 18" length to be cut shorter without the fear of running or unravelling. The Cotton and Lycra construction, along with our unique finishing processes make the Ultra-Fit Filler Sock extremely soft. The nylon reinforced toe increases durability.

Features of the Ultra-Fit Filler Sock include:

- Exceptional stretch that allows the sock to fit like a glove
- Conforms to irregular shapes, including Symes and Chopart amputations
- Can be cut to length without running or unravelling
- Knitted toe pocket with minimal side seam eliminates common heavy seam at distal end of sock
- Full one ply thickness
- Nylon reinforced toe for added durability
- Available in AK and BK versions, along with a smaller size suitable for pediatric and upper extremity amputees
- Also available with a vulcanized 3S hole
- Offered in convenient packages of six
- Available sizes fit approximately 90% of amputees

Ultra-Fit Filler Sock™

An Ultra-Fit Lightweight Half-Ply Cast Sock is also available!

BK Prosthetic Tube Sock

An Economical Alternative to a Traditional Prosthetic Sock

The Comfort BK Prosthetic Tube Sock is a good alternative to a traditional full featured prosthetic sock, particularly when low reimbursement is an issue. These socks are made using a unique air float terry construction throughout the entire length of the Sock. This allows the socks to offer good comfort and durability. The three ply thickness also makes them an excellent choice as a filler sock.

Features of the BK Prosthetic Tube Sock include:

- All cotton construction provides maximum moisture absorption
- Terry lined for good comfort
- Low profile seam above toe area for additional comfort
- Reversible, and can be worn with either the smooth side or the cushioned side against the skin
- Ideal for wearing multiple layers to achieve desired thickness
- Air float terry construction allows the sock to breathe
- An ideal companion to the Comfort sheath
- Conveniently available in packages of six, with each sock individually wrapped

Traditional Prosthetic Socks

Traditional Prosthetic Socks from Comfort Products have characteristics unique to the type of yarn used to manufacture each of the Traditional Socks. Each of the Comfort Products Traditional Prosthetic Socks are manufactured to the same high quality standards as all of the products that carry our name. These socks are manufactured by Comfort Products using only the highest quality materials available to ensure that your patient receives the best product that is possible to manufacture. A wide range of sizes and plys in each of the different styles of these socks means that there is a Comfort Products Traditional Prosthetic Sock that is ideal for any amputee.

Comfort Products can also do custom manufacturing of any of our socks. Our knitting technicians have many years of experience with custom knitted prosthetic socks and stand ready to handle your particular special request. We know and understand that each product we manufacture is intended to help improve the quality of life for an amputee. We accept that responsibility and take it very seriously.

All Comfort Products Traditional Prosthetic Socks are available with a vulcanized 3S hole. Please ask one of our friendly and knowledgeable customer service representatives for more information.

Traditional Prosthetic Socks are available with the following materials:

100% Virgin Wool

100% White Cotton

100% Silkoline (Mercerized Cotton)

**See the following pages for more information on
Comfort Products Traditional Prosthetic Socks**

100% Virgin Wool Traditional Prosthetic Socks

100% Virgin Wool Traditional Prosthetic Socks From Comfort Products are still a favorite of many amputees. The high quality wool allows amputees to experience wool's unique combination of warmth, absorbency, insulation, resilience, texture and versatility. Wool can absorb up to 1/3 of its weight in moisture without becoming damp. Moisture can then evaporate into the air, helping to keep bodies cool and acting as a "natural air conditioner".

100% White Cotton Traditional Prosthetic Socks

White Cotton Traditional Prosthetic Socks From Comfort Products are still the choice of many amputees. Cotton is still considered by many to be the most comfortable, versatile and durable of all fibers, either natural or man-made. Cotton is also absorbent with good strength and is machine washable. White Cotton Traditional Prosthetic Socks from Comfort Products are manufactured using only the finest cotton available.

100% Silkoline

Traditional Prosthetic Socks

Silkoline Traditional Prosthetic Socks From Comfort Products have their own unique appeal. Silkoline is Mercerized Cotton with all of the characteristics of standard cotton, including absorbency and good strength. However, Mercerized Cotton is given additional finishing processes to offer more luster, strength, and receptiveness.

***At Comfort Products, living up to our name
every day is more than just a slogan.
It's our way of life, and a promise to you!***

ComforGel Liner

The ComforGel Liner is a unique design that sandwiches a special formulated gel between inner and outer layers of cotton fabric. The stretch fabric allows for the liner to conform to virtually any shape and provide exceptional comfort, while the nylon reinforced distal end provides for great durability. The great stretch allows for ComforGel Liners to be used for AK, BK , Arm, and even Symes or Chopart applications!

Available in three and five ply thicknesses and a variety of sizes to accommodate practically any amputee. Standard gel length is 9", however a 12" gel length is also available. X-Tra Styles have gel for the full length of the sock.

Features of the ComforGel Liner include:

- Exceptional comfort for the amputee
- Gel formulated specifically for prosthetic use
- Unique sandwich design surrounds gel with durable cotton fabric
- Standard version has 9" of gel
- Extended gel is available, up to the full length of the sock
- Standard lengths of 12" and 14"
- Longer lengths available upon request
- Two thicknesses available, easily identified by Yellow stitching for 3 ply and Green stitching for 5 ply
- Appropriate for any level of amputation
- X-Tra version is ideal for Symes and Chopart level amputations
- Very cost effective!

**Need extra comfort
with durability?**

Look no further!

INSTRUCTIONS

CARE: Turn sock inside out. Machine wash using cool water and delicate fabric cycle. Spin dry in washer.

Hang dry with open end down to drain. Do not dry in dryer.

Avoid direct sunlight. No bleach. Do not wring.

DO NOT: Wring or twist - possible damage to gel and/or fabric could result. Excessive heat could cause loss of mineral oil and degradation of gel. Bleach will cause loss of fabric strength and premature failure.

Add a "3" to the end of any ComforGel part number for a vulcanized 3S hole

Super ShearTM **Gel Liner**

***Very conformable & soft mineral oil gel liner
for the distal end of a residual limb***

Comfort Products Super Shear Gel Liner is an ideal solution to provide relief over bony prominent areas, or to give a slight improvement in socket fit. Just roll the liner onto the distal end of the residual limb. The mineral oil in the Super Shear Gel Liner will also help with minor skin problems. Available in three sizes to fit virtually any residual limb.

Conveniently available in pairs and very affordable!

Features of the Super Shear Gel Liner include:

- Rolls on and off the residual limb with ease
- One ply equivalent thickness when rolled on
- Two gel liners per package
- Three widths to accommodate virtually any size
- Super Shear Gel Liners are 14" long
- Can easily be trimmed to shorter lengths

Size	Part Number	Fits Sock Sizes	Length
Narrow	CGELSSN	Pediatric, Arm, up to BK-0	14"
Regular	CGELSSR	BK Sizes 1, 2, 3	14"
Wide	CGELSSW	BK Sizes 4, 5, 6	14"

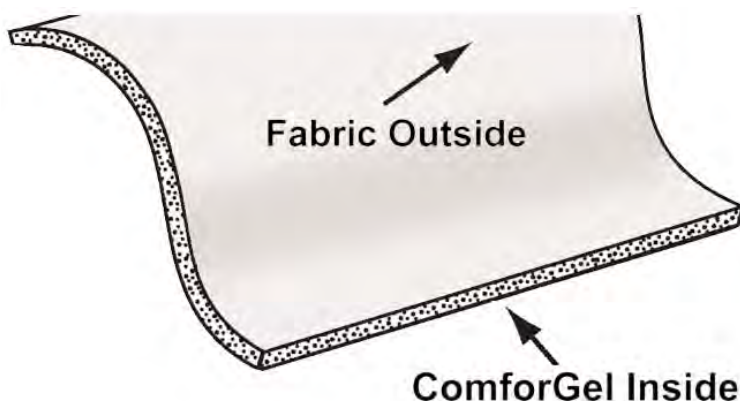

Keep your skin soft and smooth with the ComforGel™ Sheath

The ComforGel™ Sheath combines the benefits of a traditional sheath with the comfort offered by gel for below knee applications. This durable sheath is a traditional sheath on the outside and has gel with medical grade mineral oil on the inside! The specially formulated gel helps to keep the skin soft and smooth. The ComforGel™ Sheath offers great stretch, which allows conformity to irregular shapes.

Features of the ComforGel™ Sheath Include:

- For below knee applications
- Gel impregnated with medical grade mineral oil
- Durable sheath on the outside
- Specially formulated gel helps to keep skin soft and smooth
- Great stretch for conforming to irregular shapes
- Approximate 3 ply thickness
- Total sheath length of 14"
- Gel length of 9"
- Conveniently available in one size to fit most BK amputees

Part Number:

CGELSH

Living up to our name every day since 1907!

Prosthetic Sheaths

Prosthetic Sheaths from Comfort Products provide the wearer with maximum comfort and accommodate the natural changes that occur from day to day. The stretchable nylon and polyester construction ensures a snug fit that helps overcome any looseness that could possibly cause soreness and discomfort.

Features of the Comfort Products Prosthetic Sheath Include:

- Reinforced toe for greater wear resistance
- Unique open mesh design that stretches to conform to shape while allowing for needed ventilation
- Turned welt construction provides strength where it is needed most
- Offered in AK and BK versions
- Available with a reinforced distal 3S hole
- Conveniently packaged and sold individually

 Prosthetic Sheaths Sizes and Part Numbers			
Size	Sock Length	Part Number

**When you think of prosthetic sheaths,
think of the company that lives
up to its name every day.**

Silver Liner Sheath™

Designed to wear under any liner without compromising suspension!

Silver Liner Sheath with the unique advantage of **Xstatic** Silver for solutions to many of the problems common to many liner wearers.

Anti-odor -

inhibits bacteria growth, neutralizes ammonia proteins

Antimicrobial -

eliminates odor causing bacteria and fungus

All natural -

Safe and non-toxic. Contains no added chemicals

Thermodynamic -

cooler in summer, warmer in winter

Therapeutic -

high conductive performance for more comfort

Anti-Static -

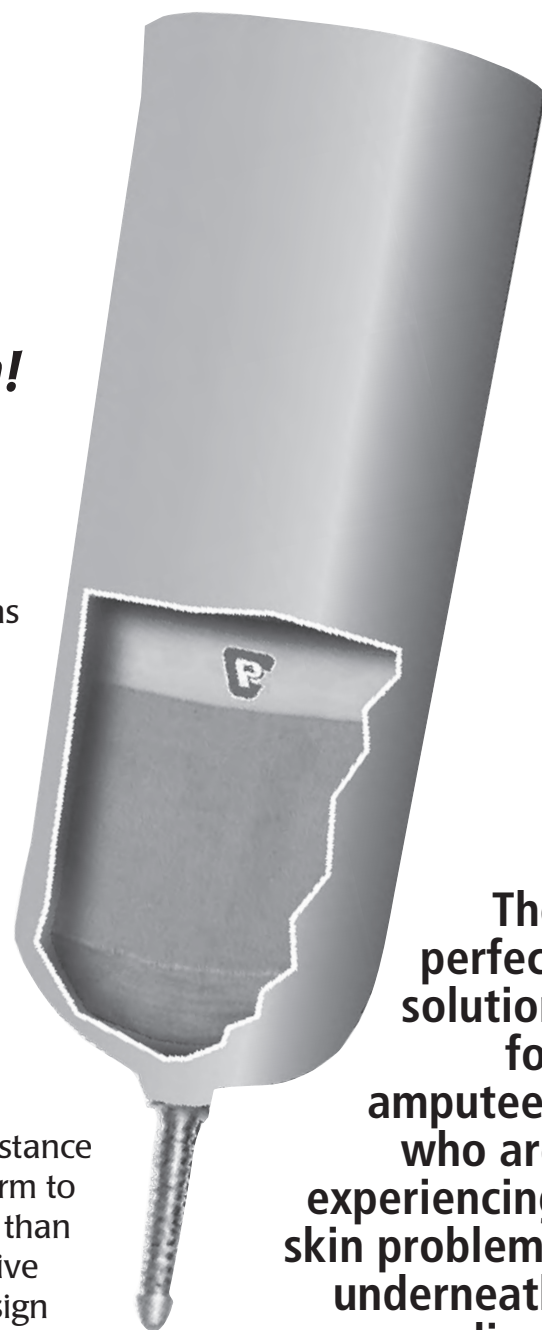

has very high electrical conductivity

Silver Liner Sheaths are reinforced for greater wear resistance and durability. A unique mesh design stretches to conform to any shape while allowing ventilation. The top is shorter than our traditional sheaths, which allows the wearer to receive the full benefits of silver without interfering with the design characteristics of the liner.

Use and Care

Instructions:

Machine wash, gentle cycle, mild detergent, no bleach. Machine dry, gentle cycle, medium heat.

The perfect solution for amputees who are experiencing skin problems underneath a liner

AK Medium	14" - 18"	XSHA

Thickness of all sleeves is 4mm

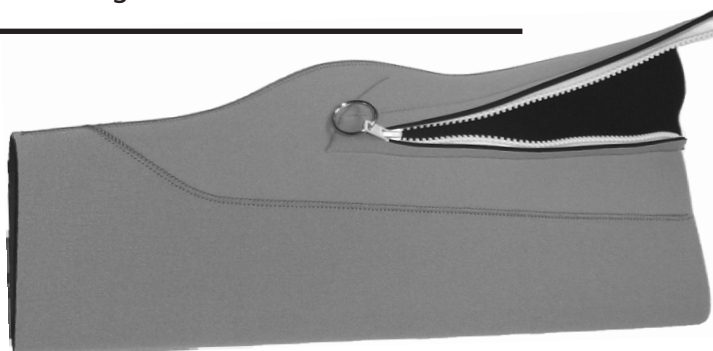

COMFORT **Endurance!**TM **SUSPENSION SLEEVE**

Comfort Endurance Suspension Sleeves are made of a higher grade neoprene than most of the Neoprene suspension sleeves available on the market. It is easy to distinguish the higher quality when you take time to feel an Endurance suspension sleeve and compare it to others. It has a much smoother feel, and is a tougher and more durable neoprene material than most others. Endurance sleeves also have a rugged outer nylon cover.

Every Endurance suspension sleeve is manufactured using an intensive blind stitching and gluing process that greatly reduces seam failure. With three styles and two stock colors available, there is an Endurance sleeve that is right for everybody!

Custom colors are also available for an additional charge.

COMFORT **Endurance!**TM **ZipSleeve**

The Comfort ZipSleeve is the newest addition to the family of Comfort Endurance Suspension Sleeves. ZipSleeves add a little zip" for geriatric patients who may be wearing a neoprene suspension sleeve. Gone are the days for the geriatric patient with the struggle of tugging and rolling endlessly to get their sleeve in place. Simply zip it up!

When ordering, please order one size up

**"Zip it Up"
with the
ZipSleeve
from Comfort
Products!**

**Thickness of all
sleeves is
4mm**

COMFORT **Endurance!**TM **CRITERION**

The CRITERION features a smooth skin lining that gives superior comfort against the skin and reduces the chance for popliteal bunching. For patients without strenuous activity levels, the CRITERION is an excellent choice for comfort and durability. For highly active patients, try the Endurance SPORT. For geriatric patients, try the Endurance ZipSleeve.

COMFORT **Endurance!**TM **SPORT**

The SPORT has all of the features of the CRITERION with the added benefit of a nylon lined center section to reduce abrasion.

This design allows the sleeve to give excellent suspension in even the most demanding of conditions. For patients with less active lifestyles, try the Endurance CRITERION. For geriatric patients, try the Endurance ZipSleeve.

***When you need the best neoprene suspension sleeve,
call the company that lives up to its name every day.***

BK Stump Shrinkers

BK Stump Shrinkers from Comfort Products combine durability and comfort into a product that is priced right for the value minded. The medium compression shrinker is lightweight and provides tapered compression from the closed distal end to the open proximal end. The Comfort Grip Top makes donning easy, especially for geriatric patients. The top can easily be rolled over the fingers to allow for donning with limited hand strength. The tough nylon cover is extremely durable, while the pocket toe design eliminates stitching on the distal end. This allows the stitches to be placed at the most comfortable position. A full range of sizes means there is a Comfort BK Stump Shrinker ideal for every BK amputee!

Features of the Comfort BK Stump Shrinker include:

- Tapered compression from the closed distal end to the open proximal end from 25mmHG to 20mmHG
- Pocket type toe with special side stitching for additional comfort
- Cotton Comfort Grip Top makes donning easier, especially helpful for geriatric patients
- Color coded toe seams for easy width identification
 - GOLD Small
 - BLUE Large
 - RED Medium
 - GREEN Extra Large
- Great durability at an exceptionally competitive price

When you need comfort, durability and value in a BK Stump Shrinker, trust the innovation leader in knitted goods for orthotics and prosthetics - Comfort Products.

X-SILVER *Latex Free!* BK SHRINKER

The X-Silver Shrinker from Comfort Products is packed with hi-tech features at a cost that makes it practical for everyone to use. The X-Silver Stump Shrinker incorporates X-Static Silver for proven anti-microbial protection. The amazing stretch with gradient compression ensures a perfect fit every time. The top can easily be rolled over the fingers for donning with limited hand strength and now features a new interior gel band to help keep the shrinker in place.

Features of the X-Silver Stump Shrinker Include:

- X-Static Silver provides all-natural anti-microbial protection
- Tapered compression from the closed end to the open proximal end.
- Easy Grip top makes donning easier, helpful for geriatric patients.
- Color coded for easy width identification
- New Gel band at the top of the shrinker helps keep the shrinker in place.
- 20 - 25mm Hg • **Latex Free!**

X-SILVER AK SHRINKER

Latex Free!

***Made with
X-static[®] Silver for proven
anti-microbial protection and
unique therapeutic properties***

A more comfortable environment for long term use with the superior, soft and flexible **EasyWear[™]** Belt designed to eliminate a feeling of tightness around your middle.

- X-Silver Shrinkers are seamlessly contoured at the distal end to improve fit and comfort.
- 20 - 25mm Hg Medium Compression
- Available in 5 widths and 3 lengths
- Interchangable for use in either right or left side applications
- Easy to care for - just machine wash and dry
- One belt size accommodates a 32" waist to a 50" waist which makes this Shrinker easy to adjust.
- A stay put gel band helps keep the Shrinker from migrating and provides superior soft tissue containment on the inner thigh.

SpectraSock

The Spectra Sock from Comfort Products was designed for use with carbon feet. The socks help to protect the foot from dust and dirt while eliminating the common noises caused by the feet moving inside the foot shell. In addition, Spectra Sock provides an effective barrier to help protect the footshell from excess wear caused by the carbon rubbing against the foot shell.

SilverMax™ AFO Liner Sock

The newest addition to Comfort AFO liner socks!

- Designed for the unique needs of the AFO wearer who may experience excess odors or perspiration
- Ideal for those who may have problems with rashes, dermatitis, or the formation of fungus
- Xstatic® silver plaited **CoolMAX** places silver directly against the skin for maximum anti-microbial protection while wicking moisture away from the skin
- Silver naturally eliminates odor-causing bacteria and helps prevent dermatitis, athlete's foot, & fungus
- Helpful in preventing fungus from developing against the skin where the strap is riveted to the AFO
- Completely safe and non-toxic
- Keeps wearer cooler in summer and warmer in winter
- Thermal properties of silver provide additional comfort
- Unique and attractive color

H.O.W.

Hip Orthosis Wicking Sock

**Do you know How?
Let us introduce you!**

The Hip Orthosis Wicking Sock from Comfort Products is an ideal companion to a hip abduction orthosis.

The 98% CoolMax and 2% Lycra construction allow for moisture to be effectively wicked away from the skin, while breathing to keep the wearer cooler in the summer and warmer in the winter.

The Hip Orthosis Wicking Sock helps to reduce chafing while keeping the orthosis in place. The H.O.W. sock is lightweight yet extremely durable. There is an opening in the crotch area for convenience.

The Hip Orthosis Wicking Sock has superior stretch in all directions which allows one size to accommodate most adults.

If you still don't know H.O.W., give us a call. We will be glad to introduce you!

Double Lay-R™ Diabetic Sock

The unique “sock-within-a-sock” design of the Comfort Double Lay-R™ Diabetic Sock make it an ideal choice for active individuals. The advanced fibers and innovative design make it a great choice for comfort and benefits.

Some of the features of the Double Lay-R™ Diabetic Sock include:

- Designed specifically for the diabetic patient, or those with circulation problems
- “Sock-within-a-sock” design to greatly reduce the frictional forces within a shoe
- Friction takes place between the two layers of the sock, rather than between the sock and the skin
- Luxuriously soft for superior comfort
- DuPont Coolmax® yarn wicks moisture away from the skin to keep the wearer dry and comfortable
- Ideal for someone active with hiking, running, or brisk walking where blistering may occur with a traditional style sock
- Three sizes easily identified by color of toe seam
- Flat toe seam to reduce the risk of irritation
- Available in White, Black, Navy & Brown
- Sold in individual pairs
- Also available in an Ankle Height Version!

Comfort Products, Inc. Still the innovation leader in knitted goods for the Prosthetic and Orthotic Industry

Private Labeled Diabetic Socks

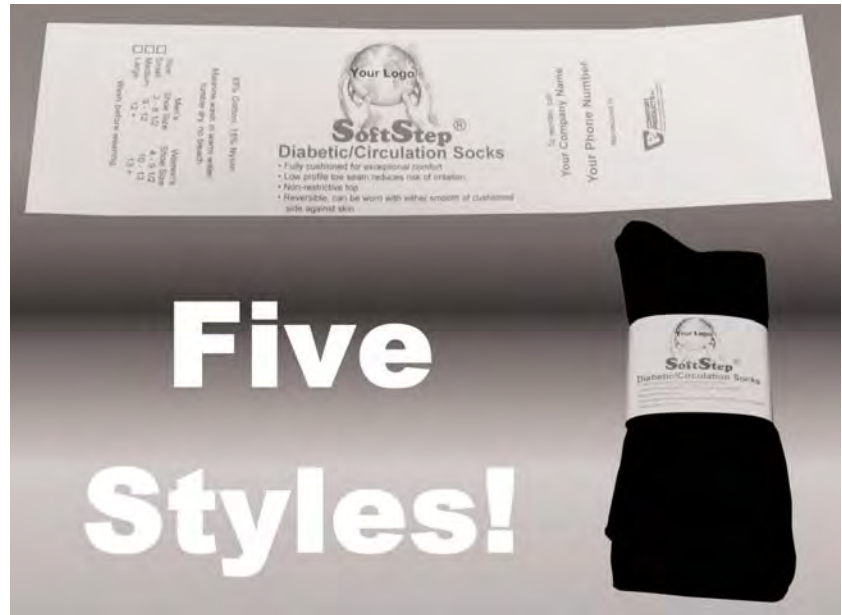

By Comfort Products

Are you a business that does not offer Diabetic Socks because they are not reimbursable by Medicare?

If so, why are you sending your diabetic shoe patient to a local department store to buy a poorly designed sock? If they are going to purchase a sock anyway, why not have them purchase a Diabetic Sock from you that can offer significant benefits? Many socks that are available on the market today not only offer no benefits for the diabetic patient, but can actually harm the foot.

Comfort offers five different styles of Diabetic Socks. Each style is designed to offer significant benefits for the particular needs of every diabetic patient.

With three different adult sizes, along with a wide range of fashionable colors in all styles, you can be assured of a perfect solution for every diabetic patient that visits your facility!

No two businesses are the same. Success requires companies to differentiate themselves from their competitors. It is essential that customers remember you and return when they want to make additional purchases. These basic business principals led Comfort Products to offer facilities **Comfort Private Labeled Diabetic Socks**. These socks have wrappers that show your company name and logo, along with your phone number for the patient to call to order more! Show you care with your own private brand of diabetic socks.

Contact us for more information and pricing. A minimal one time set-up charge for artwork applies, along with a small upcharge over the standard price of our Comfort Diabetic Socks. We keep it simple so that you can look good and help your patients feel good!

Comfort Private Labeled Diabetic Socks give you the opportunity to:

1. Increase the benefits available to your diabetic patients
2. Increase the exposure of your business
3. Increase your cash sales

Custom retail displays and product flyers with your name and logo also available!

Styles and sizes of **Comfort Private Labeled Diabetic Socks** are shown on the next page.

EXEMPLAR™

Level I Support/Travel Sock

The Exemplar™ Support/Travel Sock is a light compression sock ideal for travelers in need of a little support. The Exemplar Sock enhances venous return while sitting or standing for extended periods with graduated compression of 15-20mm Hg.

The Exemplar Support/Travel sock has a Comfort Ultra Toe Seam for maximum comfort. Travelers will appreciate the hidden support while maintaining the appearance of a standard dress sock. The knitted top band keeps the sock in place without constriction while the graduated compression improves comfort and minimizes leg fatigue.

The Exemplar Support/Travel Sock is made using a blend of Cotton, Nylon, Polyester, and Lycra to allow the unique benefits of each material to come alive in a single product! Cotton is worn against the skin to keep the wearer cool and comfortable.

Exemplar Socks are available in 3 adult sizes in your choice of 6 colors.

Exemplar Padded Foot...

compression socks feature the added comfort of our terry-lined padded foot.

EXEMPLAR™

Level II Support/Travel Sock

The Exemplar™ Level II Support sock supply more aggressive support. They are designed to enhance venous return while sitting or standing for extended periods with graduated compression of 20mm to 30mm Hg.

Exemplar Support/Travel socks have a Comfort Ultra Toe Seam for maximum comfort, providing support while maintaining the appearance of a standard dress sock. The knitted top band keeps the sock in place without constriction while the graduated compression accelerates venous return, improves outflow, maximizes comfort, and minimizes fatigue. Exemplar Socks are made using a blend of Cotton, Nylon, Polyester, and Lycra to provide the unique benefits of each material while cotton is worn against the skin for a cool and comfortable fit.

Exemplar Socks are available in 3 adult sizes in your choice of 6 colors.

AgTM FOOT SOCK

"The sock with the Silver Lining"

The Ag Foot Sock from Comfort Products is the sock that you may have seen on our table at some of the trade shows. This sock is made using the same materials and processes as our Ag Prosthetic Sock. It was originally developed as a promotional tool to allow people who are not amputees to wear the sock and experience the same benefits as an amputee might experience when wearing the Ag Prosthetic Sock.

If you remember your high school chemistry, you probably know that iAgTM is the Periodic Chart of Elements symbol for silver. Silver has been known for its medical and therapeutic benefits for thousands of years. X-Static is a trademark of Noble Fiber Technologies. X-Static fiber has a layer of pure silver permanently bonded to the surface of a textile fiber. This allows the silver to retain all of its natural characteristics. X-Static eliminates bacteria and athlete's feet fungus. This is helpful for those with dermatitis or rashes, as the elimination of bacteria will often eliminate these problems. Eliminating bacteria also helps to eliminate odors.

CoolMax[®] is a trademark of DuPont. CoolMax[®] has been specifically engineered to keep you dry and comfortable. When the body perspires, CoolMax[®] moves moisture quickly away from the skin to the outer layer of the fabric. It then dries faster than any other fabric available on the market today.

Sizes and Part Numbers for Ag Foot Socks

Sock	Fits Men's	Fits Women's	Part
Size	Shoe Size	Shoe Size	Number
Small	3 - 8 ½	4 - 9 ½	AGSW
Medium	9 - 12	10 - 13	AGSM
Large	12 +	13 +	AGSG

Comfort Products combines X-Static[®] and CoolMax[®] in the Ag Prosthetic Sock and Ag Foot Sock. The X-Static silver is actually plaited on the interior of the sock. This allows for all of the silver included in the sock to be placed directly against the skin, which is where it must be in order to be effective.

Take the Comfort Challenge with a pair of Ag Foot Socks. Take a pair and wear them for several days in a row without laundering them! (OK, so don't tell your friends you are doing this.) These socks will look and feel just as fresh on the second and third day as they did on the first. By wicking the moisture to the outer layer of the sock where it can evaporate, the sock will not hold any moisture. By eliminating the bacteria the sock will be odor free and will look and feel fresh all day long. Try a pair, or a dozen or so, today!

Healthy SolesTM Diabetic Socks

Color Socks with CoolMAX[®] and Anti-Microbial X-static[®] Silver in the Dye-Free, Light-Colored Foot area. Uniquely Designed to look just like regular dress socks!

Light-colored area is made of special, non-irritating, high-wicking CoolMAX[®] fiber with X-static[®] silver anti-microbial protection.

These unique socks are non-binding with cushioned foot and minimized toe seams for walking comfort. Made with a special non-restrictive top as recommended by physicians. Healthy Soles Socks are made in Ankle-High, and Mid-Calf Crew Styles. Available in Black, White, Brown and Beige. Machine Wash and Dry, Gentle Cycle, No Bleach.

Master Craft

PVA Bags

High quality, reliable PVA Bags are essential to every orthotic and prosthetic facility that does fabrication.

- For Comfort Products, our MasterCraft trademark is more than just a name.
- PVA bags require high quality raw materials, skill and care to properly manufacture.
- Every PVA bag that we produce combines the highest quality raw materials, the latest equipment and technology, and Comfort Products old world craftsmanship.
- Our strong, narrow seam helps ensure top quality cosmetic results every time.
- We even package our PVA Bags in a special yellow bag for ultraviolet light protection to ensure that your product arrives fresh and ready to use.

Available in standard 2" tapered, at the small end, and nine different widths at the wide end in 40" length and five widths in the 20" length.

All sizes are packed 20 bags per unit.

**Available
in tubular
stockinette,
in 5 yard or
25 yard rolls**

SpectraCarbTM

STOCKINETTE

*The future
of
laminating
is here
today!*

SpectraCarb is a unique tubular stockinette developed specifically for the orthotic and prosthetic industry by Comfort Products. It is a combination of Spectra[®] and Carbon.

Spectra[®] fiber is one of the world's strongest and lightest fibers. It is, pound-for-pound, ten times stronger than steel, and more durable than polyester. Spectra is common in body armor and as reinforcement for military boat hulls that need bullet-proof capabilities. Carbon fiber has become common in orthotic and prosthetic applications. It is also used in many other industries where strength, stiffness, light weight, and outstanding fatigue characteristics are important.

SpectraCarb has already become a favorite for technicians and practitioners. Technicians appreciate that the material does not itch, while practitioners love the heat-and-relieve characteristics that allow changes in the laminated device with use of a heat gun.

SpectraCarb is most commonly used in lay-ups that alternate two layers of SpectraCarb with two layers of Comfort Multi-Size[®] Nylon until the desired thickness is achieved. Multi-Size[®] Nylon is recommended for the inner and outer layers for a superb finish.

Features include:

- Superb strength in laminations, while maintaining some flexibility
- When used with Comfort Multi-Size Stockinette, laminations have a smooth finish that allows for pigmentation
- Does not itch while working and edges can be buffed
- Carbon strips can be added to specific areas for complete rigidity
- Heat and relieve capabilities allow shapes to be modified after laminating without risk of fracturing or delaminating!
- Ideal for the inner layer of two stage laminations and orthotic applications!

SpectraCarb/~~Aralon~~ Stockinette

Another unique tubular stockinette developed by Comfort Products specifically for the Orthotic and Prosthetic Industry. It is a combination of Spectra™, Carbon and Aralon.

Spectra™ fiber is one of the world's strongest and lightest fibers, pound for pound ten times stronger than steel and more durable than polyester. Carbon fiber has become common in the O&P industry and is used in many other industries where strength, stiffness, light weight, and outstanding fatigue characteristics are important.

Aralon combines Kevlar and Nylon and provides superior impact and fatigue resistance.

Aralon is 40% stronger than fiberglass, while weighing half as much. The strength-to-weight ratio is approximately 2 1/2 times superior to fiberglass and it eliminates itching

Partner all 3 together and SpectraCarb/Aralon is created!

Here is what Practitioners like about the SpectraCarb-Aralon Stockinette:

- Very easy to work with
- Wets out very well
- Provides both strength and fatigue resistance which cuts down on layers needed in the lamination
- Very light-weight
- Contours nicely to virtually any shape mold without bridging or causing air pockets
- Safer to work with than carbon/fiberglass
- Can be heated and reshaped without delaminating
- Easy to smooth out the edges and grind

Multi-Size™ Stockinette

by Comfort Products

Advanced Features Combined into A Unique Stockinette Material!

Comfort Products Multi-Size™ Stockinette is a unique stockinette with multiple uses. It is exceptionally smooth, and will not run from either direction. The special features of this material leave it in a class by itself!

Multi-Size Stockinette Features include:

- Unique non-run construction prevents running in either direction
- Remarkable stretch that allows just four sizes to accommodate most orthotic and prosthetic requirements
- Exceptionally smooth and uniform surface that is free from the corrugated effect found with traditional nylon stockinette
- Ideal as the final layer of lamination to ensure an exceptionally smooth finish
- Great choice for vacuum forming for a smooth and true surface
- Can be used effectively for flexible polyurethane and similar type spray coatings
- Accommodates rapid size changes without folds or creases
- Very good companion product to Comfort SpectraCarb

Spectralon™

by Comfort Products

Spectralon™ from Comfort Products combines the exceptional properties of Spectra fibers with the proven characteristics of Nylon in a unique tubular stockinette or tape. Spectra™ fibers from Honeywell have the highest strength-to-weight ratio of any fiber available on the market today. Spectra is commonly used in military armor applications to protect soldiers on the battlefield. It is also used to manufacture gloves worn by workers in sheet metal and glass manufacturing plants. It has a proven track record for strength and durability, yet is extremely lightweight.

Not only is Spectra ten times stronger than steel and 40% stronger than Kevlar, it is four times stronger than Nylon and Polyester and generally stronger than most Carbon fibers.

Spectralon™ combines 65% Spectra with 35% Stretch Nylon to take advantage of the unique properties of each material in a single unique stockinette. Spectralon has excellent strength and saturation characteristics. It also does not run and has a very smooth appearance giving laminations a fine finish. The 280% strength capability of Spectralon allows it to be very form fitting.

Features of Spectralon™ include:

- Cost efficient option to other hi-tech stockinettes on the market
- Allows for a thinner layup, which requires less resin
- Compatible with Acrylic and Epoxy resins
- Lighter weight than other layup materials
- White color permits easy pigmentation
- Exceptional stretch to accommodate rapid size changes
- Lower cost per pound than carbon
- Available as a tubular stockinette and as a tape

Aralon™ Stockinette

By Comfort Products

Aralon™ Stockinette from Comfort Products combines Kevlar and Nylon to create a unique tubular stockinette with exceptional properties. The qualities of each of these materials allows for a stockinette that provides superior impact and fatigue resistance.

Aralon™ Stockinette is 40% stronger than fiberglass while weighing almost half as much. It also has a strength-to-weight ratio approximately two and one half times superior to fiberglass, and it eliminates itching!

Aralon™ Stockinette has excellent thermal stability with minimal changes in dimension through normal temperature changes. It is compatible with Polyester, Acrylic, Vinylester, Urethane, and Epoxy resins.

Aralon™ Stockinette requires no changes in normal fabrication methods and stretches like traditional stockinette.

Features of **Aralon™ Stockinette** include:

- Superior impact and fatigue resistance
- Requires no change in traditional fabrication methods
- Stronger and lighter than fiberglass
- Does not itch

Nylon Stockinette *by Comfort Products*

Nylon Stockinette from Comfort Products also represents high quality and exceptional value. Comfort uses only 100% virgin nylon which helps to achieve a nice full body with a fine gauge rib knit finish. This gives Nylon Stockinette from Comfort Products greater elasticity and a smoother finish. Available in 25 yard rolls in a dispenser type box.

Cast Socks *from Comfort Products*

All cast socks are not created equal. Cast Socks from Comfort Products use a fine gauge tubular knit which allows for great stretch in both length and width. High quality natural combed cotton gives the surface a smoother texture than some competitive products.

Cast Socks from Comfort Products feature toes with a stretch stitched seam to allow the seam to stretch without breaking. Offered in Below Knee and Above Knee versions with a round or pointed toe. Below Knee versions are available in a light weight single ply or a heavy weight double ply thickness. Above Knee versions available in heavy weight. All are available with a choice of lengths to accomodate any need!

Heavy Weight versions are available with one dozen socks per package. Light Weight versions are available with two dozen socks per package.

Ultra-Fit Cast Sock™

By Comfort Products

Ultra-Fit Cast Socks from Comfort Products are truly the ultimate cast sock! They have amazing stretch that allows them to fit like a glove. They will conform to irregular shapes, including Symes and Chopart amputations. The unique knitting process allows them to be cut to length without running or unravelling. The knitted toe pocket with minimal side seam eliminates the common heavy seam at the distal end of the sock.

Ultra-Fit Cast socks are half ply in thickness and will accommodate up to a 26" circumference. Available in convenient packages of six.

CUFL

CAST PANTS

By Comfort Products

Cast Pants from Comfort Products allow the modesty of a patient to be protected helping to eliminate embarrassing moments. The special design and use of fine gauge cotton allows for great stretch. Both legs are seam free and the cast pants can be used as a stand alone cast sock, or in conjunction with separate cast socks. Extremely economical!

Foot Cast Socks from Comfort Products make taking casts of the foot a walk in the park! Designed specifically for taking casts of the foot, Comfort Foot Cast Socks feature a special reciprocated heel and toe that helps the sock conform to the foot. The 100% natural cotton construction with double gore heel reduces stretch points in the heel area.

Step up to an economical and simple means for taking accurate foot casts. Offered in shoe sizes 8 - 13 and conveniently packaged one dozen socks per size.

Features include:

- Reciprocated heel and toe that helps the sock conform to the foot
- Double gore heel reduces stretch points in the heel area
- Elastic top helps hold sock in place while casting
- Simplifies the process of taking a foot cast
- Very economical!

CoolMAX[®] Cranial Sock

The CoolMAX Cranial Sock from Comfort Products was designed as a casting interface for infant cranial remolding orthoses.

The new Comfort CoolMax[®] Cranial Sock with Lycra is available with an open face, and is easy to tie under the chin. It intimately conforms to the shape of the child, so that it reflects well when working with Lasers. It has a close, tight knit, so that it works with dark hair, and it helps to enhance the Occipital Contours in both casting and digitizing.

BODYGLIDE®

Used Around The World By People Just Like You™

Distributed by Comfort Products

BODYGLIDE is a unique all natural skin lubricant created to stand up to rubbing and moisture, prime causes of skin irritation. It helps stop skin trouble before it starts, and it helps avoid the need for first aid products. It is remarkably comfortable and reliably effective. **BODYGLIDE** is not another liquid, powdery substance, lotion, potion—or an empty promise.

BODYGLIDE feels and performs differently than other skin products. It feels clean and is non-oily, long lasting, and comfortable. Compared to messy creams, gels, balms, and jellies, **BODYGLIDE** stays where you apply it and provides superior results.

BODYGLIDE protects you against friction, chafing, blisters, rashes, and skin soreness. It is made for the surface of the body and safely penetrates the skin. It is also hypoallergenic and does not breakdown.

Available in a convenient and affordable .45 ounce stick

Part Number

BDYGLD

Features of BODYGLIDE include:

- Fights friction while preventing chafing and blisters
- Allows skin to breathe while guarding skin against rashes, dryness, and wetness
- Long lasting and penetrates skin to lubricate and moisturize
- Easy to apply non-oily and non-greasy formula that glides on from a stick and is rub proof
- Stays where you put it and does not evaporate
- The waterproof and sweatproof formula does not stain and removes with soap
- Contains no water and no animal products
- The hypoallergenic formula uses no animal testing
- Recommended by physicians for amputees to use on residual limbs

MINI Boy and MAXI Boy Glue Pots

Distributed by Comfort Products

The Mini Boy and Maxi Boy Glue Pots distributed by Comfort Products are a customer favorite. They are suitable for all Adhesives, Lacquers, and other brushable liquids used in the lab that are prone to evaporation. The tight fitting snap-on cap stops solvent loss to prevent product evaporation and helps to maintain correct viscosity.

Both the Mini Boy and Maxi Boy Glue Pots are made of a specially formulated plastic that guards against material accumulation and build-up. Each include a built-in brush wiping bar to help prevent material from getting on the outside.

The Mini Boy and Maxi Boy Glue Pots feature a brush storage area in the cap to help keep the brush soft and workable. The unique design allows for a constant level of material in the brush well. The wide base helps to prevent tipping over to prevent spills.

Mini Boy and Maxi Boy Glue Pots are very economical and help save enough material to pay for themselves quickly. Extra brushes are also available.

 Capacities and Part Numbers		
Description	Capacity	Part Number
Mini Boy Glue Pot	.45 Liter	GP45
Extra Brush for Mini Boy	N/A	BGP45
Maxi Boy Glue Pot	1.5 Liters	GP15
Extra Brush for MaxiBoy	N/A	BGP15

EPOXY PUTTY

Distributed by Comfort Products

Epoxy Putty from Comfort Products is available in three types to handle virtually any job. Each is available in a convenient stick form with the base resin surrounding the special curing agent. Simply twist off the desired amount and knead by hand to a uniform color and it is ready to use! Sets hard in just minutes. The unused portion can then be stored in the handy container tube where it will remain fresh until needed.

QUIKWOOD® EPOXY	FASTSTEEL® Steel Reinforced Epoxy Putty	REPAIRITQUIK® EPOXY PUTTY
QUIKWOOD Epoxy is ideal for permanent wood repairs. It stays in place, does not run or sag, and does not shrink or pull away. It has the same density as wood, and even floats, though it is much stronger than wood. It sets in 30 minutes and can be drilled, sanded, carved, and stained. It is perfect for rebuilding and reshaping wood.	FASTSTEEL Epoxy is steel reinforced making it extremely tough and durable with exceptional adhesion to a wide range of metals. It sets within minutes and can be filed, tapped, or machined in 1 hour. It is ideal for repairs and the rebuilding of parts, sealing leaks, filling holes, fabrication, or to hold fixtures. The perfect solution for metal repairs.	REPAIRITQUIK Epoxy is a great general purpose epoxy. It will plug and seal holes and leaks in most materials and even works underwater. It can be used with metals, ceramics, wood, glass, masonry, and most plastics. (However, not for use with Polypropylene or Polyethylene).
Part Number: EPQW	Part Number: EPQS	REPAIRITQUIK sets in minutes and can be sanded, drilled, or machined within 1 hour. Also for use with electrical connections, custom sealing gaskets, plumbing repairs, glass, and ceramics. Perfect for all of those odd repair jobs. REPAIRITQUIK when you need to repair it quick! Part Number: EPRQ

***When you need epoxy for repairs,
stick with a name you can trust.

Temper Foam® Blocks

Temper Foam was originally developed for NASA for use as seat cushions for astronauts. The use of Temper Foam helped to solve their problem of long-term sitting with minimal weight. Temper Foam flows and molds itself to give overall support and to distribute pressure. Unlike ordinary foam, pressure points on prominences and their accompanying discomfort are thereby reduced. Temper Foam softens under body heat and pressure to provide more uniform support. Temper Foam breathes so overheating and perspiration are minimized.

Temper Foam is a solid, viscoelastic foam which acts like a viscous liquid becoming automatically firmer when subjected to impact. Yet, Temper Foam remains soft and accommodating to the lightest pressure. This allows it to give comfortable support hour after hour, but will yield to the slightest position change. Because of this unique molding ability, positioning and balance are often enhanced.

Temper Foam can be used for cushions, padding, distal pads, orthopedic pillows, or in any place where the unique supportive properties can be advantageously employed.

Comfort Products carries Temper Foam Blocks in Soft, Medium, and Hard. For general padding and large area support, soft is recommended. Medium & Hard are recommended for high pressure areas. Care must be used to select the proper thickness and grade for full support without bottoming out.

Temper Foam® Blocks <i>Descriptions and Part Numbers</i>			
Size	Thickness	Density	Part Number
16" x 18"	1"	Soft	TF160S
16" x 18"	1"	Medium	TF160M
16" x 18"	1"	Hard	TF160H

16" x 18"	3"	Medium	TF162M
16" x 18"	3"	Hard	TF162H

Temper Stick®

Temper Stick is Temper Foam with self sticking hypoallergenic backing. Simply cut Temper Stick to shape, peel off the backing paper and press in place. Can be used directly on patient or objects, including splints and orthoses. Temper Stick can also be used to make heel or elbow protectors to isolate bony prominences.

Temper Stick® Descriptions and Part Numbers			
Size	Thickness	Density	Part Number
16" x 18"	1"	Soft	TFS4160
16" x 18"	1"	Medium	TFS4161
18" x 24"	3/8"	Soft	TFS4076
18" x 24"	3/8"	Medium	TFS4448

Temper Foam Wheelchair Cushions®

Lightweight Temper Foam Wheelchair Cushions provide exceptional long-term comfort with support and excellent pressure distribution. Many of the features of foam, gel, and liquid filled cushions are combined with the added benefits of stability and breathability. Porous Temper Foam breathes to minimize heat buildup and perspiration problems.

A cushion should be selected that prevents bottoming out. In hot and humid environments firmer cushions are recommended, while softer cushions are usually preferable in cold and dry environments. Angular frames often have higher unit pressures on the ischial tuberosities than normal and may require thicker or firmer cushions. Occasional users generally prefer softer cushions.

An attractive knit polyester cover is available. The cover is washable and allows the free passage of air and moisture vapor.

Mighty Tykes Pavlik Harness

From BOLT Systems

The Mighty Tykes Pavlik Harness from BOLT Systems is a reliable orthosis for treating infants with Developmental Hip Dysplasia. Available in five sizes, there is a Mighty Tykes Pavlik Harness to fit any infant.

The Mighty Tykes Pavlik Harness is easy to fit by simply matching the colored tabs. It may be used with or without the foot enclosures. Closures are adjustable and the harness should be worn under clothing, with the exception of a diaper. The Mighty Tykes Pavlik Harness should be hand washed with a gentle detergent and allowed to drip dry. The harness should not be placed in a clothes dryer, as the heat could damage some components or shrink the harness.

Mighty Tykes Pavlik Harness Sizes and Part Numbers			
Size	Chest Circ.	Approx. Age	Part Number
X-Small	12" - 14"	Newborn	PAVXS
Small	14" - 16"	0 - 3 months	PAVS
